Control Your World: Manage your Security and Business On-The-Go with Netwatch Web and Mobile Apps

In today's world, you need to be in multiple places at various times throughout the day. Netwatch Web and Mobile apps empower end users to access key functionality wherever you are, at any time – providing you with the power of security management on-the-go.

The Netwatch Web App was designed with your needs in mind. It provides a fresh UI experience, intuitive and easy to navigate functionality, and more robust features.

With the Netwatch Web App, you have the ability to:

- ✓ Access all of your sites remotely
- ✓ View all cameras and access live views
- ✓ Edit, remove or create new zones
- ✓ Easily drag and drop cameras from one zone to another
- ✓ Modify existing arming and disarming schedules
- ✓ Add arming/disarming exceptions
- ✓ Edit, add, or remove contacts
- ✓ Update alarm response verification & escalation protocols
- ✓ Create visitor passes
- ✓ Access site design plan*

*Must be provisioned by your Netwatch Dealer.

Introducing Netwatch Mobile App

The new centralised phone application for both the android and iOS platforms, providing users with self-serve functionality to manage Netwatch Proactive Video Sites.

🛡️	**Quickly Arm/Disarm Cameras**
📹	**Live Camera Views**
👤	**Contact Management**
⚠️	**View Incident Reports**
⚙️	**Update Key Settings**
🚚	**Provide Visitor Access**

Similar to the Netwatch Web App, the Netwatch Mobile App provides you with the ability to login at any time, from any location and perform key functions, such as viewing live camera feeds, arming or disarming cameras or zones, and even accessing previous incident reports.

To get started, visit the Google Play Store or Apple's App Store to download the latest version of the Netwatch Mobile App. Credentials are provided by Netwatch or your trusted dealer.

Our interactive mobile app provides access to the following:

- ✅ **Arming and disarming** - Quickly arm or disarm a camera or update arming and disarming schedules of Netwatch-protected cameras

- ✅ **Live Camera View** – Access all monitored cameras at any time, from any location.

- ✅ **Visitor Access** - Create visitor passes for a seamless experience. This function also provides an audit trail, addressing key compliance concerns for many industries.

- ✅ **Contact Management** – Create, edit or remove key contacts who will be notified in the case of an alarm or issue on a site.

- ✅ **Zones** – Zones organise key areas at your location. Easily create a new zone and create arming and disarming schedules based on your most critical areas.

- ✅ **Notices** – Quick access to all incident reports.
