

Stop Crime Before it Happens with Netwatch Proactive Video Monitoring

An end-to-end, purpose-built platform that can consistently stop crime before it happens

Why Proactive Video Monitoring is Different

The best way to stop a would-be criminal in their tracks is with Proactive Video Monitoring (PVM). As the name says, it is proactive – meaning that action is taken in advance of an incident, not during or after it occurs.

Proactive video monitoring allows for our team of expertly trained intervention specialists at our state-of-the-art monitoring centers to intervene before a crime occurs, effectively preventing it from being committed. The intelligent detection solution delivers 24/7/365 protection, reducing the need to hire security guards, while improving the ability to monitor and respond to potential threats.

Netwatch Proactive Video Monitoring Benefits

- ✓ 24/7 intelligent proactive monitoring
- ✓ Real-time detection and intervention
- ✓ Live, personalised audio warnings
- ✓ Reduce costly false alarms
- ✓ State of the art locally-based monitoring facilities
- ✓ 75% cost savings over physical security guards
- ✓ Incident reporting within 24 hours

How Proactive Video Monitoring Works

Detect

Using proprietary AI and machine learning, our cameras identify breaches that the human eye cannot and sends an alert.

Verify and Assess

Once alerted, highly-trained intervention specialists at evaluate the situation over a live video feed, determining the threat level and appropriate action to take.

Deter & Intervene

Specialists speak directly to intruders with live, personalised audio, which stops crime 98% of the time.

Report

Within 24 hours of an incident, a detailed, step-by-step account of the incident is automatically emailed to key stakeholders and available for download.

Manage Your Security and Business On-the-Go with Netwatch Web and Mobile Apps

In today's world, you need to be in multiple places at various times throughout the day. Netwatch Web and Mobile apps empower end users to access key functionality wherever you are, at any time – providing you with the power of security management on-the-go.
